DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Weber U.S. Patent No. 6,167,378. Weber discloses a method and system for digital automation of: supplier fulfillment instructions, special instructions, logistics, shipping coordination, generation of transactional data, necessary reporting, payments and banking in consideration of completed transactions [Col 1]. Weber discloses interaction between a plurality of entities (order request management systems) within the supply chain [Col 1]. Order information processing and related transactions are seamlessly transferred between the parties, digitally (integrating respective ORMS data). In reference to claim 3, the use of a computer readable medium having instructions to perform the system and method of Weber is inherent in that all transactions are affected digitally.
